

Windows / Linux System Administrator

PARSEC Group, Inc., a national training and consulting company since 1986, is seeking a highly motivated IT professional with an extensive background in Microsoft and Linux operating systems for a full-time position in Denver, Colorado.

Responsibilities:

The chosen applicant will:

- Maintain the PARSEC network infrastructure and servers.
- Provide consultation and administrative services on-site, over-the-phone, and remotely for clients, as needed.
- Deliver classroom training

Requirements:

- Candidates must be local to Denver or the surrounding area.
- Must be very knowledgeable in operating systems, and must be able to effectively troubleshoot and communicate problems on-site, over the phone, and via remote connection.
- Must be available after-hours (on-call) for any support issues that our clients may have.

Technical Skills:

Following is a partial list of skills that will be required to complete jobs for PARSEC and clients.
